

By choosing Marked and Bundled Cable, you are able to:

- Customize the wire for each specific project.
- Consolidate multiple reels into one, facilitating an easier pull.
- Eliminate the cost of scrapping excess wire created by using numerous standard length reels.

Cross Tape Assembly

Wire Type: THHN / XHHW / USE / CAT Cables / FPLP, FPLR / PV / LSZH / and more upon request!

MB Cable offers another solution for those jobs where the spiral wrap is too restrictive. The Cross Tape Assembly holds together our bundles with a pull tab every 5 to 10 feet depending on the customer's preference.

- Bundles are secured by electrical tape every 5-10 ft depending on the length of the run.
- Tabs are easily removed for a cleaner, faster pull.
- Conductors can be marked at spacing intervals of 1 to 6 inches in either black or white ink.
- No minimum run quantities.
- Conductors come from one manufacturer guaranteed.

Each bundle consists of conductors from a single manufacturer, ensuring that from the purchasing to the pulling, MB Cable can guarantee you the right product for your job.
