

Brazill Brothers

# MB Cable

Marked & Bundled Cable

The ink that we use has been tested successfully with the following Pulling Compounds and we therefore recommend their usage: American Polywater Dyna Blue, American Polywater Poly J, Ideal Aquagel, Greenlee Cable Cream, Gardner Bender Poly Gel, and Ideal Cable Glide.

Additional protection from the deteriorating effects of the pulling compound on the ink is provided through a plastic wrap at the end of the bundle. It is highly recommended that the pull is made with the plastic protection. This becomes more critical the longer the pulling compound is in contact with the wire.
